

# College Research Work Sheet

## Tips and Advice before you set off

Look at a map of the campus before you leave home and have a plan for what lectures/ presentations you need to attend and what time they start.  
Don't wait to find out the basics about the college, do your research beforehand, so you are ready to ask more in-depth questions.  
Be ready for a day's work. If you treat this as a day off, you won't benefit from the day, and you're setting yourself up to make poor decisions.  
Politeness goes a long way.  
Listen in on some conversations. Often other students will ask questions and get information that is useful to you.

College Name:	
Location:	Date:
Start Time:	Finishing Time:
Particular Lecture I need to attend:	

## These are websites have I researched before attending the Open Day
